BUILDING PRODUCTS Top 100 Special Section

Readers Choose Top 100 Products

BUILDING PRODUCTS features hundreds of building supplies, tools and architectural elements within every issue. Each year thousands of readers fill out the reader service card found inside the magazine to request more information directly from manufacturers about the products highlighted inside.

This process is the basis for developing the BUILDING PRODUCTS Top 100 list. BUILDING PRODUCTS tabulates the responses from your reader service cards over the course of a year to determine which of the hundreds of new and improved products mentioned in the magazine generated the greatest interest among readers.

The products on this list all have something in common. All of them possess a key feature that industry pros believe will give them an edge in successfully building—and selling—homes. From construction components that make the homebuilding process easier and more streamlined, to high-profile architectural elements that homebuyers actively appreciate, each product is innovative, high-tech, and stylish.

The following pages profile many of the products and companies on the BUILDING PRODUCTS Top 100 list. We invite you to take a look through these pages to see firsthand which readers have identified as the hottest on the market today. And if you see something here that piques your interest, be sure to use the reader service card—or contact the manufacturer directly—to get more information about it.
